Ricardo Piedade

APM certified Project Manager with 10 years of experience in Project Management, during this time I have completed training on ISO 9001:2015, Lean Six Sigma & CDM Regulations. I have now completed my Diploma in Full Stack Software Development with Code Institute, accredited by Edinburgh Napier University. Currently seeking a career change to the tech industry. Experience building responsive websites using HTML, CSS, JavaScript, Python, Django, GitHub / Gitpod, AWS – S3. Looking for an opportunity as a Junior Developer that will provide the best environment to build on these skills and pave the path for a career in the software industry. Fluent in English (native) and Portuguese.

IT Systems / Languages

GitHub | HTML5 | CSS3 | JavaScript | Python3 | Bootstrap | JQuery | Django | Jest | PostgreSQL | SQLAlchemy | AWS - S3 | Primavera P6 | CEMAR | ARM | TeamCenter | SharePoint | SAP | Oracle | Unifier |

Current Status

Student – Full Stack Software Developer

Code Institute – June 2021 to date
www.codeinstitute.net

Project 1 – **June 2021 to August 2021**
Static front-end website using HTML and CSS: Deployed site: motorbikebuddy.com

- An interactive Front-End web application using HTML and CSS.
- Focused on the principles of user experience design, accessibility and responsivity.
- HTML and CSS codes were tested using W3C and Jigsaw validators with no errors.

Project 2 – **September 2021 to November 2021**
Game using JavaScript: Deployed site: Rock-Paper-Scissors

- An interactive Front-End web application in the form of a game, using HTML, CSS and JavaScript.
- Game commonly known as Rock-Paper-Scissors which include a link to an external website opened on a new tab.
- Uses modal pop-ups to prompt Users for responses based on what they would like to do.

Project 3 – **November 2021 to December 2021**
Backend program using Python: Deployed site: love-running-members-log

- A command-line application that allows users to manage a common dataset about a particular domain.
- An application built with Python, that allows jogging fans to log their daily runs during the week.
- The application processes this data and provides the User with analytic data about their progress.

Project 4 – December 2021 to April 2022
Full Stack Toolkit Project: Deployed site: diners-3star-restaurant

- The objective of this project was to build a Full-Stack site based on business logic used to control a centrally-owned dataset.
- This project includes an authentication mechanism and provides role-based access to the site's data or other activities based on the dataset. Languages and frameworks used on this project are: HTML, CSS, JavaScript, Python, Django and Bootstrap.

Project 5 – April 2022 to July 2022 - Course Complete
Full Stack E-Commerce Application: Deployed site: c-soars Ltd,

- Similar to project 4, however this project also includes an authentication mechanism and provide paid access through Stripe. The application is a B2B app, designed for a Drone company offering Professional Drone Surveys to clients requiring such services by reducing time and risks associated with the use of scaffolding. This site integrates with the Amazon Web Service - S3 to provide storage capacity for the static and media files used throughout the website. Languages and frameworks used on this project are: HTML, CSS, JavaScript, Python, Django, Bootstrap, AWS, S3, Stripe.
